Aviation Repair Design Engineers

The position

We are looking for Aviation Repair Design Engineers to be responsible for Design Engineering activities related to product lines.

Key Roles & Responsibilities:

- Understand and interpret data as provided in the OEM manuals.
- Perform repair design activities across various disciplines including but not limited to Metallurgy Composite Materials, Machining, and welding.
- Liaise with FAA DERs to obtain approval for repair designs.
- Supporting the Compliance Verification Engineers (CVE) and Designated Airworthiness Representatives (DER) by Demonstrating compliances for large aircraft component repairs.
- Provide technical support for routine shop-floor operations with reference to standard industrial best practices.
- Provide technical support to the Business Development and Marketing teams to ensure business competence.
- Provide technical support to the QA department and assist with Investigations of quality escapes, warranty claims, and corrective actions.
- Provide technical support to the Customer Services team to ensure effective communication between stakeholders.
- Develops creative and innovative structural repair solutions improving maintainability, and reparability of nacelles structures.
- Support customer service requests with development of technical dispositions, instructions, and designs for damage allowance/treatment and deviations to nacelles structures design and repairs (Inlets, Fan Cowls, Thrust Reverser/Core Cowls, and Exhausts).
- Continuous Improvement Champion / Lead for Design Engineering Department.

Qualifications:

- Bachelor's degree, Aeronautical Engineering or Mechanical Engineering or Equivalent.
- Must have experience on Aircraft Structural repair design with FAA DER or EASA DOA approvals for 3 years minimum.

- Knowledge of the Aviation Regulations (CS and FAR) and Basic knowledge of EASA Part 21.
- Proficient in creation of Engineering Drawings using CAD software.
- Proficiency in Engineering software such as MS Office, CATIA, Solid works and finite element analysis.
- Excellent command in read, written, listening, and spoken English.
- Must have following specific competencies:
- Metallurgical Science
- Proficient to create CAD file from 3D scan cloud data and Reverse Engineering Process
- Structural Repair Design

Total rewards

As an AAR team member your rewards include:

- Annual uniform
- PPE safety equipment
- Transportation
- Vacation benefits, including Thai Public Holidays
- Provident Fund
- Group Insurance
- Training and development opportunities
- Staff engagement and recognition events

Performance objectives

- **Teamwork** – collaborates with colleagues to achieve results and is also comfortable working independently
- **Building trust** – operates with integrity, discloses own positions, remains open to ideas, and supports others through dignity, respect, and fairness
- **Building relationships and partnerships** – develops and leverages relationships within and across teams to achieve results
- **Communication** – conveys information and ideas clearly and concisely to individuals or group in an engaging manner, helping them understand and retain the message
- **Analytical skills** – must be able to use data to determine cause and effect for complex problem solving
- **Quality orientation** – accomplishes tasks by considering all areas involved, no matter how detailed
-

Why should you apply?

- AAR is the only aerospace / defense company on Forbes' America's Best Mid-Size Employers list.
